Summary

I am a software engineer. I develop tools, websites, and applications.

PROJECT EXPERIENCES

MSL Philippines Website

- Worked as a **Front End Developer** utilizing **React.js (JSX)** and **Laravel Framework** for component-based UI and dynamic routing.
- Ensured code quality and modularity while integrating with backend APIs.
- Collaborated in a team environment to deliver responsive and maintainable interfaces.

Paluto Reservation Website - https://unli-paluto.onrender.com/unli-paluto

- Developed a **Fullstack web application** that allows customers to reserve food orders online.
- Designed the **frontend using HTML, CSS, and JavaScript** for user interaction.
- Built the **Python backend** to interface with **Google Sheets and Google Drive APIs**, allowing real-time reservation tracking.
- Utilized **Google Sheets as the database**, storing and retrieving reservation data seamlessly.

BuildMaster

Worked on a commercial construction product, first as an intern and later as a junior software engineer. Details under NDA.

ColorAid 2024

- Developed a web application named **ColorAid**, designed to enhance color perception for individuals with color vision deficiencies. This innovative solution integrates real-time adaptive color correction, offering a suite of tools that include a comprehensive color vision test and personalized color adjustments.
- **Tech Stack**: Python, Flask, Firebase, Google Cloud Services, CSS, HTML.

Story Creation with Gemini - http://bit.ly/3OYeUFT 2023

- Story Creation: Users can create a story by filling out a form that captures the theme, setting, characters, conflict, and desired outcome of the story.
- Dynamic Interaction: The app interacts with Google's Gemini AI to generate stories based on the specified inputs.
- Conversation History: Displays a history of the questions asked and the stories generated, allowing users to see a log of their interactions.
- Reset Functionality: Users can reset the conversation, clearing all history and starting afresh.
- **Tech Stack**: Streamlit, Python, Gemini API.

Káon 2023

- **Káon** is a mobile application developed to help users track their daily food intake and calorie consumption easilyd. It combines an intuitive interface with advanced features to enhance dietary monitoring and promote healthier eating habits.
- **Tech Stack**: Dart, Flutter, Python.

AWARDS

Academic Awards 2021 - 2024

- Awarded with Silver Medal for Academic Excellence by the WVSU - CICT Department and Bronze Medal the following year and back again to Silver Medal.

WORK EXPERIENCES

Web Developer at Quirao Group of Companies – La Paz, Iloilo City 2025

- Oversaw quality assurance for internal web and mobile applications, ensuring optimal functionality, performance, and user experience.
- Administered and maintained company databases, ensuring data integrity, security, and availability across platforms.
- Led the development and deployment of reservation-based websites, streamlining customer booking processes and enhancing operational efficiency.
- Collaborated with cross-functional teams to support business needs through scalable and responsive web solutions.

Front-End Web Develop at MSL Philippines 2025

- Developed and maintained dynamic user interfaces using **React (JSX/TSX)** within a **Laravel-based** backend framework.
- Worked closely with backend developers to implement RESTful APIs, ensuring seamless data flow and application performance.
- Integrated responsive design principles and component-based architecture for scalable and maintainable web applications.
- Contributed to improving front-end build processes and code quality through consistent use of modern development practices and tools.

LEADERSHIP EXPERIENCES

Cyb Robotics Organization - Vice President for Income Generating Projects 2023

- Oversaw and managed various income-generating initiatives within the organization.
- Implemented projects that generate revenue or income to support the organization.
- Experienced working with different equipment such as 3D Printers and Laser Cutters which we used to produce/create our products that we sell.

West Esports - Esports Team Manager 2024

- Fostered a positive and collaborative team environment for the players resulting in better performance and teamwork.
- Managed a competitive Esports team, coordinating training schedules and tournament participation.

SKILLS

- **Frontend –** React.js (JSX/TSX), Flutter (Dart), HTML5, CSS3, JavaScript, Laravel.
- **Backend –** Python (Flask, Streamlit), JavaScript (Node.js basics), RESTful API design, Google Cloud Functions.
- **Database –** PostgreSQL, Firebase (Realtime DB & Firestore), Google Sheets API (as DB proxy), SQL
- **Cloud & Deployment –** Vercel, Google Cloud Services (GCP), Render.com, Firebase Hosting.
- **Tools & Collaboration –** Git, GitHub, Figma (UI reference), Agile team collaboration, QA Testing, Google Workspace.
- **Workflow Tools** - Zapier
- **ERP Tools** - Oracle
- **Cloud & Deployment** – Vercel, Google Cloud Services (GCP), Render, Firebase Hosting.
- **QA Testing** - Jira, Selenium
- **Designing**: Figma, Canva.
